the book of laughter and forgetting analysis Laughter is the biological reaction of humans to moments, or occasions of humor. It is an outward expression of amusement. i, . On average, a child laughs 300 times a day while an adult laughs only 17 times a day. i, . The majority of men report that their laughter is a chuckle, and the majority of women report that theirs is a giggle.

### **Connecting Laughter, Humor and Good Health**

the book of laughter and forgetting analysis Laughter has a way of undercutting the most solemn things, turning serious moments into something cheap and absurd. Because of this, laughter is the natural ally of forgetting. Both actions take the characters further away from themselves and carry them into the wasteland of insignificance.
